

### REMARKS

By this amendment, Applicants have amended claim 31 to recite that the crystal size is 10 to 300  $\mu\text{m}$  rather than 10 to 30  $\mu\text{m}$ . This amendment is supported by the disclosure in the paragraph bridging pages 3 and 4 of Applicants' specification.

Since this supplemental amendment is in reply to an office requirement made after the first reply was filed, entry of this supplemental amendment under 37 CFR 1.111(a)(2)(D) is requested.

The Examiner has indicated that Applicants have failed to specifically point out the support for "crystal size of 10 to 30  $\mu\text{m}$ " in claim 31. By this amendment, Applicants have amended claim 31 to be consistent with the paragraph bridging pages 3 and 4 of Applicants' specification, which paragraph supports the amendment.

The Examiner has also alleged that Applicants have failed to specifically point out the support for "tensile strength (x) at 20°C larger than 240 MPa" and "elongation (y) larger than 0.5%" in claim 32. The limitations of claim 32 are supported by original claim 3 and the disclosure at, e.g., page 4, lines 4-9 of Applicants' specification.

Entry of this supplemental amendment and favorable reconsideration and allowance of all of the claims now in the application are requested.

To the extent necessary, applicants petition for an extension of time under 37 CFR 1.136. Please charge any shortage in the fees due in connection with the filing of this paper, including extension of time fees, to the deposit account of

Antonelli, Terry, Stout & Kraus, LLP, Deposit Account No. 01-2135 (Case:  
503.39364CX1), and please credit any excess fees to such deposit account.

Respectfully submitted,

/Alan E. Schiavelli/
